

# End-to-End NDC Solutions

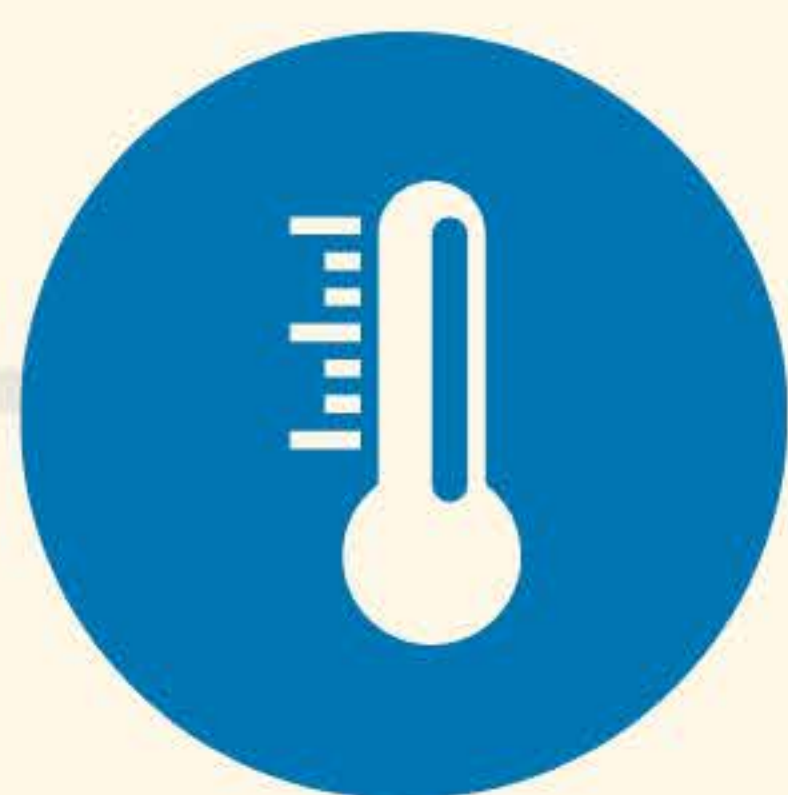

Working hand in hand with governments and local stakeholders to develop transformative climate change mitigation and adaptation policies and action at the speed and scale necessary to prevent dangerous climate change, while advancing sustainable development.

## Our Experience

**NDC Revision & Enhancement**

**Embedding Sectors in NDCs**

**Roadmaps for NDC Implementation**

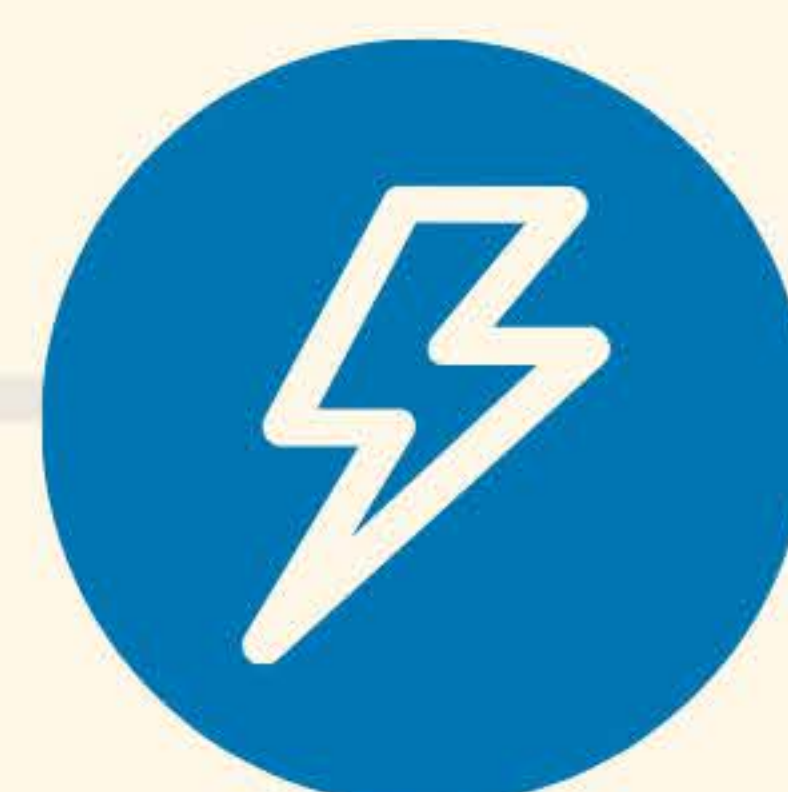

**Developing Financing Solutions**

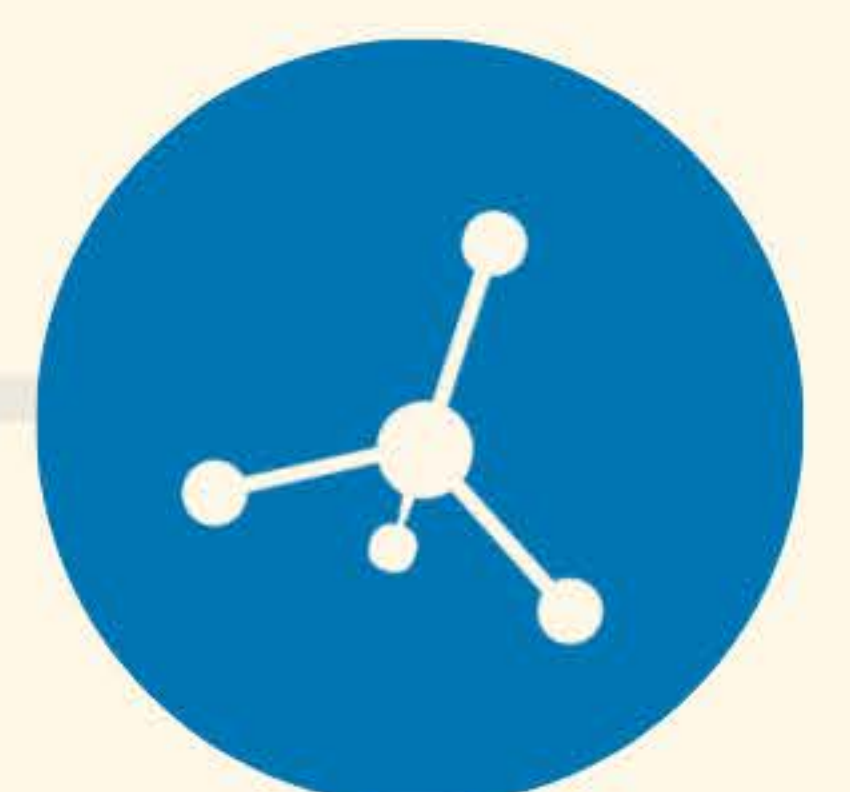

**Mitigation and Adaptation Strategies**

**Stakeholder Consultation**

**Measurement, Reporting and Verification (MRV) Systems**

**Policy Advisory & Capacity-Building**

# Our Services

## NDC Revision and Enhancement

Facilitating the revision of NDCs to align with updated national and sectoral plans and measures, as well as supporting the raising of ambition of NDC targets in accordance with the objectives of the Paris Agreement

## Embedding Sectors in NDCs

Integrating sectoral strategies and measures into national climate targets, with a focus on high-impact areas like cooling, resource efficiency and adaptation to strengthen NDC goals

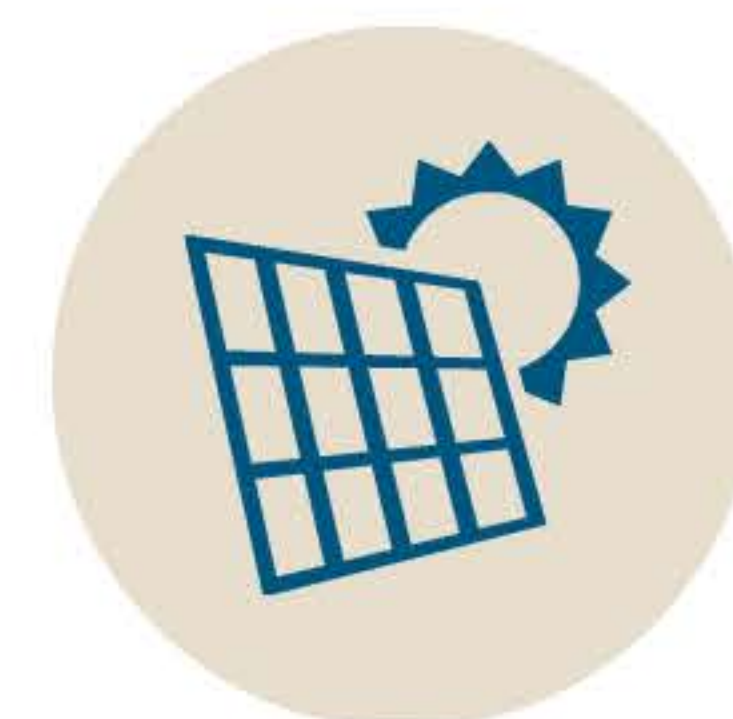

## Roadmaps for NDC Implementation

Assisting countries in developing action plans and roadmaps for NDC implementation, including prioritization of mitigation and adaptation measures, institutional framework setup, and identification of financial needs

## Developing Financing Solutions for NDC Implementation

Strengthening financial frameworks for NDC implementation, including strategies for mobilizing climate and carbon finance, as well as design of concrete financing options

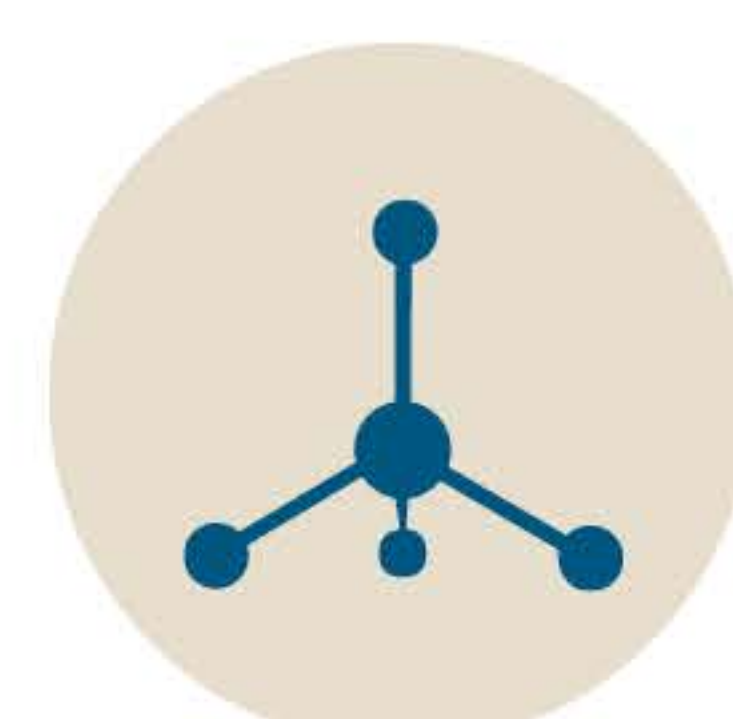

## Mitigation and Adaptation Strategies Development

Supporting tailored mitigation and adaptation strategies, from sector-specific actions to comprehensive plans, aligning with each country's unique climate and NDC goals.

## Stakeholder Consultation

Facilitating structured engagement with key stakeholders to incorporate diverse perspectives into NDC strategies, ensuring inclusive and transparent planning processes to strengthen NDC implementation and accountability.

## Policy Advisory & Capacity-Building

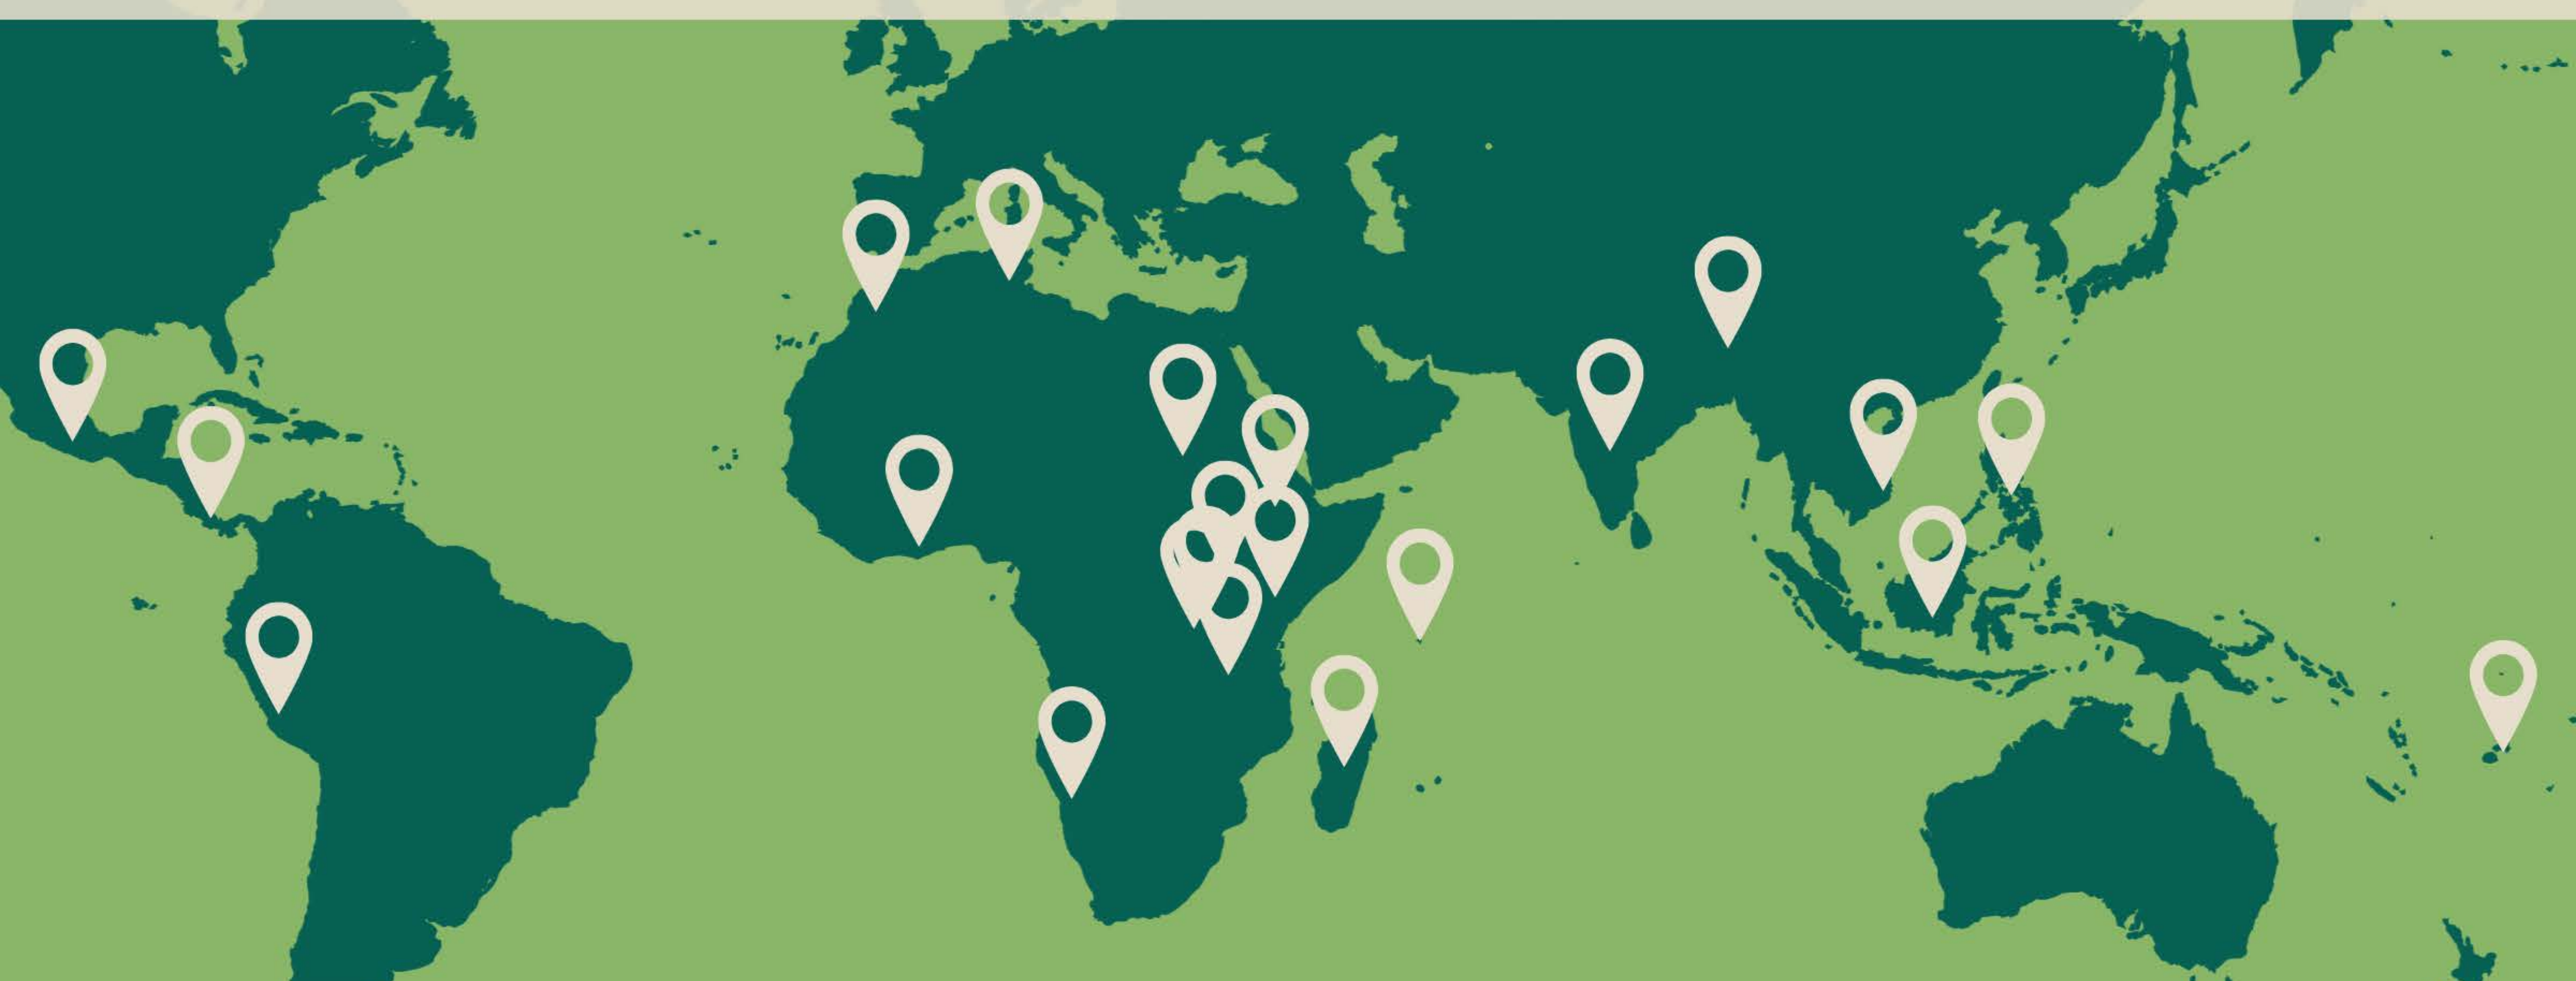

Providing targeted policy advisory, as well as training, workshops and technical assistance to enhance national capacities in strategic climate planning, reporting and cross-sectoral collaboration to streamline NDC processes

## Development of Measurement, Reporting and Verification (MRV) Systems

Formulating recommendations, advise on institutional setup and methodological approaches for national MRV systems across various sectors to enhance NDC tracking and transparency

Our Experts are driving NDC progress around the globe
